

Special Equipment Requests

	Region	Agency	County	Item	Justification	Cost
Case-by-Case; Committee Approval Required	9	Toombs-Montgomery EMS	Toombs/ Montgomery	Medical Support Unit Trailer	The primary role of the enclosed trailer would be to support our crews in providing a monitoring and cooling zone for our firefighter rehab stations. The trailer would also serve as a mobile first aid station at special events where there is an increased risk to participants (i.e. Vidalia Onion Festival Air Show). Our design also includes storage for mass casualty equipment in the event of an MCI. Please find attached documentation that includes other events this item could be utilized at.	Not Included

Medical Support Unit "MSU 1"

Thank you for taking the time to consider our project for an enclosed 8.5 x 16 ft trailer. This is an item that would serve our community in many ways. Below are a list of active scenes and special events that we would utilize this trailer at. Also included are a copy of the design and layout. The overall cost of this project is \$58,430.00, and would like to use our trauma grant funding to help in this cost. Thank you again for the consideration, and all you do for Trauma Care in our great state!

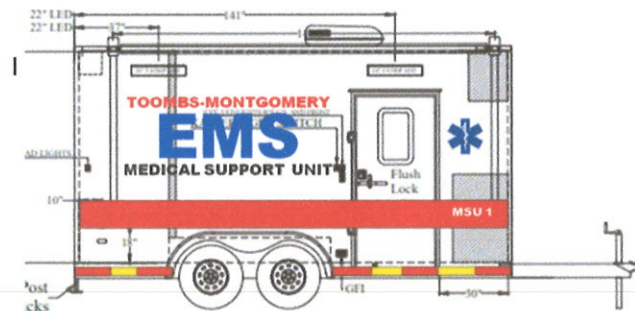

A handwritten signature in blue ink that reads "Drew James".

Drew James, EMS Director

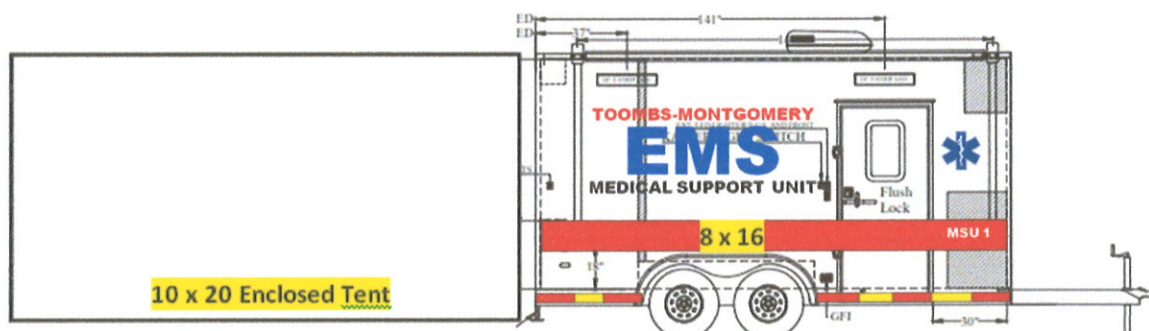

Active Scenes
